# FOREWORD

The European University Institute (EUI) is an international institution devoted to teaching and research at the highest university level, focusing on European issues, the cultural and scientific heritage of Europe and its institutional historical development. It hosts interdisciplinary research programmes on the major issues confronting contemporary European societies and the construction of Europe.

Over the years the Institute has developed world-class domains of expertise thanks to its outstanding international faculty. Through this intense activity, the EUI stimulates and nurtures research networks aimed at advancing knowledge in the Social Sciences and Humanities and at addressing grand challenges. It also acts as bridge between theoretical and applied research; between academia and the world of practice, including national as well as European institutions.

Furthermore, the EUI has developed one of Europe's largest doctoral and postdoctoral programmes in the social sciences and humanities. Its doctoral and postdoctoral researchers, including the Max Weber and Jean Monnet Programme fellows, as well as the professorial staff, play a crucial role in European and international networks, research groups and journals.

The works collected in this report attest to the dynamism of the whole EUI academic community and serve to make the EUI research output better known in both academic and non-academic milieus.

I am therefore very pleased to introduce the work of all those who have contributed by their publications to this twelfth directory of the 2019 academic publications of the EUI and its members, which contains the details of more than one thousand publications (97 books, 157 book chapters, 89 theses, 406 journal articles, 134 working papers and 122 research reports, lecture series and policy briefs and papers, and 5 datasets).

Readers wishing to see the very latest EUI publications should consult Cadmus, the EUI Research Repository <https://cadmus.eui.eu>, which is updated daily and where an increasing proportion of our output is made available in Open Access, in line with the [EUI policy for Open Access](#) aiming at making research as widely available as possible.

# INTRODUCTION

I am pleased to present the twelfth edition of the EUI Academic Publications and Data directory listing the academic publications and research data output of the EUI and its members that appeared in 2019.

This annual directory is as always an export from Cadmus, the EUI Research Repository. This issue has however been prepared under the special circumstances of a complete quarantine imposed in Italy because of the COVID-19 crisis. Consequently, most staff – from the Library and the whole EUI – have been working remotely from their homes since 11 March 2020 and I am proud that the report has been completed thanks to their great efforts and ability to adapt to this situation of crisis.

The Directory is organised by sections reflecting different output types (books, theses, articles, working papers, etc.). This is the first time the EUI repository and the directory also include datasets, thanks to a merger of Cadmus and the ResData repository in October 2019.

This year's directory reflects a reinforced Library Open Science office team with the arrival of a new staff member. Open Science staff checks and assists EUI authors to know which version of a publication it is possible to make available in Open Access. Nearly half of the 2019 Publications are Open Access (42 %) and in the directory the Open Access symbol  highlights these. It is also worthwhile mentioning that, in 2018, in line with EUI Academic Rules and Regulations, the first EUI theses originally placed under embargo (for four years) have become available online in open access. You can see all publication details via the Cadmus link.

Members of the EUI are obliged to include their publications in Cadmus and should send the details to [cadmus@eui.eu](mailto:cadmus@eui.eu). Publications in Cadmus will also be pushed to EUI members' ORCID profiles when they have connected it to EUI Cadmus <https://cadmus.eui.eu/ORCID/>. This service to authors has been achieved through an ORCID–Cadmus integration made possible by the Library's ORCID membership.

Finally, I would like to thank all the members of the EUI community who submitted the details of their publications accurately. Without their co-operation, keeping the Cadmus repository up-to-date would be an impossible task.

# CADMUS AND OPEN ACCESS AT THE EUI

The [EUI Open Access Policy](#) encourages scholars to facilitate the widespread dissemination of their research by making their publications available in Cadmus, the EUI's Research Repository.

The EUI has signed the following milestone declarations of the open access movement:

- The Berlin Declaration on Open Access to Knowledge in the Sciences and Humanities (in 2011)
- The Budapest Open Access Initiative on its 10th Anniversary (in 2012)
- The European Open Science Cloud (EOSC) Declaration (in 2017). All institutions endorsing EOSC

Cadmus promotes the visibility of EUI research, and enables EUI academic community to make their research available online. Over the years, an increasing proportion of publications in the repository are available in Open Access.

## Cadmus figures

- **EUI Research Output 2019:** 1.010
- **Open Access Output 2019:** 420 (42%)
- **Total records:** 24.424
- **Total Open Access publications:** 9.502 (39%) - [All OA publications](#)
- **Yearly usage statistics:** 300.000 visits and 700.000 page views

The EUI became institutional supporting member of ORCID in November 2017. ORCID iD, the Open Researcher and Contributor ID, is an alphanumeric number which uniquely identifies authors in the academic and scientific publishing world.
